Assignment 1 - Sketchbook

You are required to document all of your design process by using a sketchbook. I will be grading on content, quantity of work and diversity of mediums used in your book. You should have sketches (color and black & white), images relative to your design process (including photographs), and any other design process materials that can support your design process. Please organize your sketchbook(s) in the following order:

- Project 1 All process & photos of 1st and final model
- Project 2 All process, final drawings & photos of final model
- Project 3 Divided up into three sections of Programming, Schematic Design & Design Development. Must show all process and documentation of each phase of work.

The sketchbook must be an 8.5 x 11" hardbound (no spiral) sketchbook.

These sketchbooks should always be with you and will be graded systematically for their content and documentation. Assume that an "A" student will fill at least one sketchbook per studio.
