Bellevue College is an excellent educational value, providing high academic quality and affordable tuition.

A college education:
- Secures your economic future: the earnings gap between young adults with and without bachelor’s degrees has stretched to its widest level in nearly half a century
- Provides an expanded understanding of the world and personal growth
- Exposes you to new subjects and discovery of an interest, passion or aptitude you did not know you possess

Attending Bellevue College helps you:
- Pay lower tuition rates for your first two years of college
- Get the basic classes completed before transferring to a university
- Reduce and/or postpone student loan debt, potentially saving thousands of dollars for those who need financial assistance

How much will it cost?

Attending BC costs about one-third the cost of attending a four-year Washington state college like the University of Washington, based on the average cost to attend for two years (about 90 credits) and you can earn an associate’s degree in the process!

Lower cost does not mean lower quality. Research has shown that our transfer students do as well or better than students who start directly at a four-year university.

“My parents saved more than $100,000 by sending me and my siblings to Bellevue College for our first two years of college.”

How to Become a BC Student

Bellevue College is an open enrollment school so getting started is easy! Your first step is applying for admissions.

We do not require SAT, ACT, high school transcripts or a minimum GPA.

We accept all students who meet requirements in one of the following categories*:

› Any applicant who has graduated from high school, or is 16 or 17 years old with a proof of a GED completion, or is 18 years of age or older.
› Currently enrolled high school students who successfully assess into college-level English. However, these students are admitted quarter-by-quarter and are not considered “continuing students” unless they have been admitted through the Running Start program.
› Selected applicants who meet the qualifications for selective-admissions programs. Some selective-admissions programs have enrollment limits and cannot accept all qualified applicants.
› If you are still in high school, you may be eligible for one of BC’s High School Programs such as Running Start.

*Some exceptions for entrance to the college are made on a case-by-case basis if you do not meet eligibility criteria.

ENGLISH COMPOSITION AND WOMEN WRITERS - 10 CR
This course looks at the influence of women writers from the past (Virginia Woolf, Adrienne Rich, Anna Ina, Audre Lorde, Anne Sexton, Maya Angelou) on women writers of the present (Maggie Nelson, Chimamanda Ngozi, Jeanette Winterstan, Zadie Smith, Lena Dunham, Roxane Gay). We will look at gender representation, female sexuality, domesticity and motherhood, and the ways in which the women who came before have helped question, alter, resist, subvert, and reimagine these topics for the women of today.

Materials from this course will constitute the basis for student research papers.

SOCIAL SCIENCE DIVISION

Interdisciplinary Studies combines the study of several subjects into one integrated course or “learning community,” usually for ten or more credits. Each IDS course features a theme that forms a common thread across disciplines. The focus of these courses is you. Students learn with each other and from each other by discussing readings in small groups (seminars), taking part in group activities, and, in some courses, by taking field trips. These programs emphasize the process of learning as well as course content. The student centered, discussion-oriented approach engages students as active participants in their own learning.

INTER 150 Fighting for the Planet: The Political Economy of Climate Change - 10 CR
The science is in. Climate change is threatening life on the planet. Unless humans radically reduce the burden we place on the earth, we are headed for disaster. Unfortunately, the global community has done little to battle climate change. Identify, key policy decisions of the last decade push us in precisely the wrong direction; calling for faster economic growth and higher levels consumption. How is this possible? Are we in denial! Why are our leaders ignoring the facts? And, most importantly, what can you do to become more knowledgeable and engaged with environmental issues? This class will address these questions and explore the relationship between capitalism, our political system, and the nature of the environmental crisis.

Every class offers an age appropriate children's program along with parenting information providing support, skills and knowledge to help with the task of raising healthy families.

Parent and child classes are located in the communities of Carnation, Snoqualmie, Sammamish, Issaquah, Bellevue, Renton and Mercer Island. Registration is ongoing so call to join a class anytime.

FIGHTING FOR THE PLANET: The Political Economy of Climate Change
The science is in. Climate change is threatening life on the planet. Unless humans radically reduce the burden we place on the earth, we are headed for disaster. This class will address these questions and explore the relationship between capitalism, our political system, and the nature of the environmental crisis.
Team taught by Brandon Unti, Economics and David Spataro, Political Science.
