

Metric Search

Name _____ Section _____
Date Due _____

Find a total of 30 items which are measured in metric units. Identify the item and the measurement on the label.

For example: 1 bottle Pancake syrup = 710 mL
 1 Acetaminophen caplet = 500 mg

- a. 10 of these should be measured in **mass** units such as grams, milligrams, kilograms, etc.
- b. 10 of these should be measured in **volume** units such as liters, milliliters, cubic centimeters, etc.
- c. 10 of these should be measured in **length** units such as meters, centimeters, millimeters, kilometers, etc. These may be harder to find. You may need to get out a metric ruler and measure some household items.

ORGANIZE YOUR DATA so that you can use the information to have a better "feel" for metric measurements.
