

United Nations Sustainable Development Goal 14:

THERE ARE
100 Million Tons OF
PLASTIC In oceans
around the world

**SAVE
LIFE
BELOW
WATER**

STOP
PLASTIC
Pollution

OVER 1 Million Marine Animals
are killed EACH year due to plastic
debris In the ocean.

1. What personal strengths did you demonstrate through the community-Engaged and civic Education (CECE) component to this course? How were they demonstrated?

A personal strength that I demonstrated through the CECE was always doing my research and learning as much as I can about the topic of the assignment. This was demonstrated in my assignments and the effort I put into them.

2. What did you learn about yourself in the process of doing the CECE component to the course? How did you grow? If comfortable share a story from the class that demonstrates this personal learning or growth.

Something I learned about myself is that I didn't know a lot about civic issues and ways to help in the community. I also learned that you can use art as a way of helping and engaging in the community.

3. Describe one way in which the community- Engaged and Civic Education (CECE) component helped you succeed in learning and/or applying the course content.

The CECE component to this class helped me learn because using real life scenarios and issues motivated me more and helped me take it more seriously. It also makes it easier to relate to.

4. How satisfied would the partner organization / client be with your engagement or your final deliverable? Why? If no partner or client, how did the broader community benefit from your engagement?

I believe the broader community benefited from my engagement by helping get the word out about civic issues through my art which in turn helped the community.

5. If you were to do the community-Engaged and Civic Learning (CECE) component again, what would you do differently? Why?

If I were to do the CECE component again I would spend more time looking into more ways art can help and what I could do.
