

Disability Justice

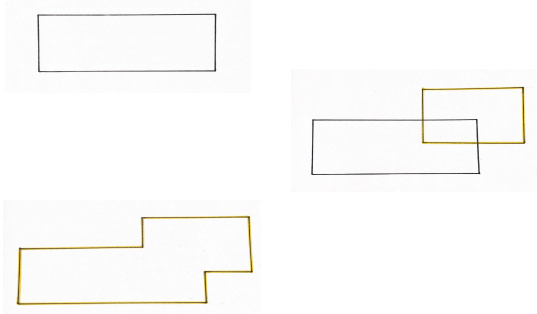

Design a more clearer and more logical layout with enough space for not only ADA but for other people who might not see their disability because it is not visible.

Was more aware about the furniture and textures/patter I picked for my Coffeehouse. Different types of chairs for everyone to be comfortable in their needs.

Concept : Merge

Private and public spaces merging to create a community. Merge is to connect or unite. I want this project to explore private and public spaces where people can feel safe and comfortable making relationships in the community that can talk about social justice. I will be exploring this through texture, colors and form.

Design Parti

Sustainability Strategies

Psychology of behavior:
Public Vs. Private
Third Place:
Public = Third Place Crowding
Community & comfortable
ADA & Universal Design:
COVID and ADA in public spaces

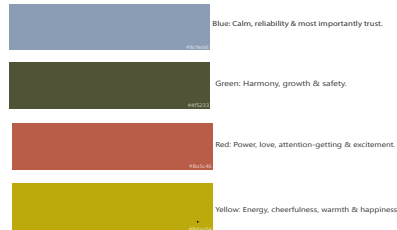

Stakeholder Priorities

Gathering Space
Info Workstation
Outside Gathering Area
with Seating
