

INTRODUCTION :

Project vehicle :
a) Integration of work and comfort – designed to create a sense of community and encourage collaboration/ social gathering
b) a neutral materials palette is kept simple and balanced to create a harmonic experience in the working residential space

Program :
Residential space : 27,000 sq/ft
2 Bed and Bath unit (1)
Pent house unit (6)
Studio Unit (5)
Working/Lounge space
w/ bathroom : 13,000 sq/ft

My intent is to create a spatial diversity as an expression of transitioning in spaces devoted to a profession. I will express this through **inner exposure of structure** (relationship between natural/artificial light sources and materials), **shifting of time** (pattern shown through the relationship between the solid and void spaces) and **intersection of lines** (points of intersection are grid points for transition for spatial separation)
