

BA 240 Statistical Analysis**Leslie Lum****Fall 2015 Course Syllabus****Schedule**

(Subject to adjustment – changes will be announced on bc.instructure.com – check the site often for announcements or extra credit opportunities)

Week	Topics	Monday	Wednesday	QUIZZES open 8 am to 1 pm Worksheets due 11:59 pm
Sep 21	Review syllabus and course requirements. MODULE 1 Read Describing data 1.1, 1.2, 1.3, 1.4, 1.5. and 1.6 Read 2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 2.7, 2.8		Resume 1.12, 1.14, 1.18, 1.24 (Classify scale as well) Solution manuals are available in the Business Study Center C207 Text data files are on bc.instructure.com	Worksheet A Summation
Sep 28	MODULE 1	2.57, 2.67, 2.83 Plot stem leaf and do mean, median, mode, variance and standard deviation.	2.166, 2.175, and 2.176	Quiz 1
Oct 5	MODULE 2 Read Probability 3.1,3.4, 3.5, 3.6, 3.7 Read Discrete Probability Distributions 4.1, 4.2, 4.3, 4.4 Read Normal distributions 5.1, 5.2, 5.3, 5.4	General Discrete 4.22, 4.36, 4.114 For all problems, plot the entire distribution and show mean and plus and minus 3 std on graph. Team Contract Oct 7	Binomial 4.60, 4.61, 4.62	Worksheet B Binomial/General Discrete – 6, 8, 9, 10, 13
Oct 12	MODULE 2	Normal 5.42, 5.56, 5.60. For all problems, plot the distribution and show mean and plus and minus 3 std on curve on graph. Test Review: 4.18, GD 4.22, 4.35, 4.57, BI 4.59, 4.61, 4.116, 4.117, 5.111, 5.119, 5.125, 5.121	Extra Homework credit for any test review problems prepared before class.	Quiz 2
Oct 19		EXAM 1	Central Limit 6.38, 6.58, 6.64	Worksheet C Normal - 4, 5, 6 Worksheet D Regression – poverty/math, poverty/reading

BA 240 Statistical Analysis**Leslie Lum****Fall 2015 Course Syllabus**

Oct 26	MODULE 3 Read Central Limit - 6.1, 6.2, 6.3 Confidence Interval - 7.1, 7.2, 7.3, 7.4, 7.5	Large and small sample confidence interval	Large sample proportion confidence interval Large 7.16, 7.18, 7.22	Worksheet E Sample Means – 4, 5, 6
Nov 2	MODULE 3	Small 7.36, 7.38 Prop. 7.50, 7.54, 7.56	Sample size 7.70, 7.72, 7.74	Quiz 3
Nov 9	MODULE 4 Read One population hypothesis testing - 8.1, 8.2, 8.3, 8.4, 8.5.	Large 8.32, 8.34, 8.46 Small 8.64, 8.68. For all problems, draw curve, show mean, areas of rejection, decision rule, calculation of test statistic, and conclusion including p-value.	HOLIDAY	Worksheet F Single Population Hypothesis – 4, 5, 6
Nov 16	MODULE 4 and start Module 5 Read: Two populations 9.1, 9.2, 9.3, 9.4, 9.5	Prop 8.80, 8.84, 8.86 For all problems, draw curve, show mean, areas of rejection, decision rule, calculation of test statistic, and conclusion including p-value.	Test Review problems: 7.89, 7.90, 7.91, 7.92, 7.93, 7.94, 7.99, 7.103, 7.75, 7.77, 7.79 8.145, 8.130, 8.131, 8.135, 8.138, 8.139, 8.144	Quiz 4
Nov 23	MODULE 5 More than two populations 10.1, 10.2	Exam 2	Large sample 9.14, 9.110 Pooled Variance 9.20, 9.28, 9.134 For all problems, draw curve, show mean, areas of rejection, decision rule, calculation of test statistic, and conclusion including p-value. Individual Project Due Nov 25	Worksheet G Two population hypothesis - 8, 9, 10, 11
Nov 30	MODULE 5 and 6 Read Multiple Regression and Chi Square 11.1, 11.2, 11.3, 11.4, 11.5, 11.6, 11.7, 11.8 12.1, 12.2, 12.3, 12.4	Prop 9.58, 9.62, 9.66 For all problems, draw curve, show mean, areas of rejection, decision rule, calculation of test statistic, and conclusion including p-value.	Paired 9.41, 9.42, 9.46, For all problems, draw curve, show mean, areas of rejection, decision rule, calculation of test statistic, and conclusion including p-value.	Quiz 5

BA 240 Statistical Analysis**Leslie Lum****Fall 2015 Course Syllabus**

Dec 2	MODULE 5 and 6	ANOVA: 10.66, 10.67 Chi Square: 13.24, 13.26, 13.28 For problems, state the decision rule, show calculation of test statistic, and conclusion including p-value	Dec 4 Final Team Project due Test Review: 9.112, 9.113, 9.115, 9.117, 9.118, 9.120, 9.121, 9.122, 9.123, 9.125, 9.127, 9.130 Dec 7 Worksheet H Final Regression review sheet – poverty/math, poverty/reading	Dec 9 Comprehensive Final 9:30 am to 11:20 am
--------------	----------------	---	--	--

Course Requirements

	Weight	Your score
Individual exams are two pages of notes (4 sides 8 ½ X 11) which may NOT include the practice exams which must be turned in with the exam. You may use a calculator. Laptops and cell phones are prohibited. 2 exams (100 each) and one comprehensive final (125)	325	
Regression Project. Detailed instructions and project template on Canvas course site	100	
Quizzes (20 points each) 40 minutes - two tries on Canvas – Open from 8 am to 1 pm on Friday due.	100	
Worksheets (10 points each), participation and attendance.	100	
Homework. You must be <u>in class</u> to get credit for the homework. Extra credit for doing test review questions.	100	
Extra credit – 5 points for attending any college speakers and writing a 500-word paper.		
TOTAL	725	

Math 138 is required for this course. BA 240 transfers as STATS 311 at UW and is a rigorous 300 level course that requires your full participation in class and on your own time.

Time and place **Time: Monday/Wednesday 10:30 to 12:20 am. C208**
Friday online

Contact Telephone: 425-564-4063
Email: llum@bellevuecollege.edu
I will try to respond within 48 hours.
BE SURE TO PUT BA 240 IN SUBJECT HEADING OF EMAIL FOR MORE TIMELY RESPONSE.

Office hours **Office Location C207**
Lum Office Hours: MTWTh 9:30 to 10:20 am or by appointment.

Websites **All practice exams keys and assignments are placed on the bc.instructure.com class website.**
Extensive videos and other materials are linked below
Complete instructions on the Project are on bc.instructure.com in the Project file.

Required Texts **Statistics** by McClave and Sincich, Pearson/Prentice Hall 2006 (This book may be rented from the bookstore)
The **textbook data files** are posted in a zip file in the bc.instructure.com course website. All problem files are under Exercises. To use, open Excel first and then in the drop down menu right above the Cancel button, go to the top for All Files (*.*) . Browse to find the text data files and open it. You

BA 240 Statistical Analysis

Leslie Lum

Fall 2015 Course Syllabus

Other Requirements

may have to format the file into columns before using it.

Calculator that can calculate standard deviations. For instructions on TI-83 statistical functions:

<http://www.angelfire.com/pro/fkizer/Instructions/tiusrmanstat83.htm>

Goals

- Research and understand the nature of information and large data sets.
- Calculate solutions to statistical problem sets including measures of central tendency, measures of variability, probability, binomial distributions, normal distributions, confidence intervals, hypothesis testing, correlation, and regression.
- Use software to solve statistical problems.
- Communicate data effectively with written and visual display.
- Apply statistical analysis to real data including framing the problem, sorting data, selecting appropriate statistical formulae, and coming up with relevant conclusions.
- Work in teams to complete projects.

Resources

The solution manual is available at the Business Study Center in C207K. The best students **make extensive use of the study center**. Check C207K for hours.

Review sessions may be scheduled prior to exams. These are often conducted by instructors in other sections. Attend the review sessions to help you do better in the exams.

How to succeed in this course

- This course requires that you work in teams for a project. Teams will be selected by the instructor and you will be expected to behave according to professional workplace standards in dealing with your team members. This includes in-class, out-of-class, and in email communication.
- Review all materials for a module answering the questions on your reading guide BEFORE we cover the module. You will be tested on your reading on the individual and team RAT.
- We will spend two to three sessions on each module applying the concepts that you have learned.
- Your grade will be based on your individual Readiness Assurance Test, your team RAT, team problem solving and casework, team project, 3 individual exams.
- The Team Project requires that you apply what you learn to real problems or issues. This requires that you apply research, analysis and evaluation skills that will be required in your professions.

You must take **personal responsibility** for your learning to succeed in life:

- Attend all classes and participate fully in the team process
- Use the reading guide to read textbook sections, view video lectures and do homework before and during Module work WITHOUT the solution guide.
- Help your team members learn. You learn the most when you teach others the concepts.
- Do all supplemental problems at the end of the chapter in review for the test
- Do practice exams without consulting key

Grading

93 - 100%	A	4
90 - 92	A-	3.7
86 - 89	B+	3.3
83 - 85	B	3.0
80 - 82	B-	2.7
76 - 79	C+	2.3
73 - 75	C	2.0
70 - 72	C-	1.7
66 - 69	D+	1.3
60 - 65	D	1.0
Below 60	F	0

A pass grade will not be given unless all requirements of the course are completed.

Standard of Behavior

All interactions will be evaluated as to whether they are acceptable in the business

BA 240 Statistical Analysis

Leslie Lum

Fall 2015 Course Syllabus

environment. This includes interactions in the class, on online discussion forums, email communications, with the instructor, with fellow students, and in the community. Inappropriate communications include jokes and discussions your classmates find offensive, excessive messages, and other communications which would be typically deemed inappropriate in the workplace. The student will be informed and expected to comply with requests for change and improvement. Cell phone and laptops are not to be used in the class.

Student Code

Cheating includes, but is not limited to, copying answers on exams, glancing at nearby exams, turning in assignments or papers that have been used in other classes, and giving or receiving help during an exam. Cheating includes, but is not limited to, purchasing or selling notes, assignments or examination materials. Having a cell phone in view for any reason during an exam will result in a zero in the exam.

Stealing includes, but is not limited to, taking the text, notes, exams, library books or other personal property of others without their permission.

Plagiarism is presenting the words, ideas, and/or work of others as if it is an individual's own work. It includes, but is not limited to, using other's papers as one's own and including parts of published works without giving credit where credit is due.

If you choose to cheat, steal or plagiarize, or if you assist anyone in cheating, the following actions will be taken:

You will receive zero on the assignment or assessment.

A report of the incident will be forwarded to the Dean of Student Services. He/she may file the report in your permanent record and/or take further disciplinary action.

If you feel you have been unfairly accused of any of the above, you may appeal. For a description of due process, see WAC 132H-120, available in the Dean's office.

"Cheating, stealing and plagiarizing (using the ideas or words of another as one's own without crediting the source) and inappropriate/disruptive classroom behavior are violations of the Student Code of Conduct at Bellevue College. Examples of unacceptable behavior include, but are not limited to: talking out of turn, arriving late or leaving early without a valid reason, allowing cell phones/pagers to ring, and inappropriate behavior toward the instructor or classmates. The instructor can refer any violation of the Student Code of Conduct to the Vice President of Student Services for possible probation or suspension from Bellevue College. Specific student rights, responsibilities and appeal procedures are listed in the Student Code of Conduct, available in the office of the Vice President of Student Services." The Student Code, Policy 2050, in its entirety is located at:

http://bellevuecollege.edu/policies/2/2050_Student_Code.asp

Affirmation of Inclusion

Bellevue Community College is committed to maintaining an environment in which every member of the campus community feels welcome to participate in the life of the college, free from harassment and discrimination. We value our different backgrounds at BC, and students, faculty, staff members, and administrators are to treat one another with dignity and respect.

Code of Honor

By being a student in this course you acknowledge that you are a part of a learning community at Bellevue College that is committed to the highest academic standards. As a part of this community, you pledge to uphold the fundamental standards of honesty, respect, and integrity, and accept the responsibility to encourage others to adhere to these standards.

Accommodations

The Disability Resource Center serves students with a wide array of learning challenges and disabilities. If you are a student who has a disability or learning challenge for which you have documentation or have seen someone for treatment and if you feel you may need

BA 240 Statistical Analysis

Leslie Lum

Fall 2015 Course Syllabus

accommodations in order to be successful in college, please contact DRC as soon as possible.

If you are a person who requires assistance in case of an emergency situation, such as a fire, earthquake, etc, please meet with your individual instructors to develop a safety plan within the first week of the quarter.

The DRC office is located in B 132 or you can call at 425.564.2498. Deaf students can reach us by video phone at 425-440-2025 or by TTY at 425-564-4110. Application information and other helpful links at www.bellevuecollege.edu/drc

Public Safety

The Bellevue College (BC) Public Safety provides personal safety, security, crime prevention, preliminary investigations, and other services to the campus community, 24 hours per day, 7 days per week. Their phone number is 425.564.2400. Public Safety is located in K100 and on the web at: <http://bellevuecollege.edu/publicsafety/> for campus emergency preparedness information, campus closure announcements and critical information in the event of an emergency.

Participating in Business Learning Community

If you intend to and have not already done so, declare your business major. Make sure you have consulted with an advisor and laid out your courses. The Business Transfer Program recommends that you subscribe to the Business listserv which provides notices of application deadlines and events. To subscribe to the listserv, individuals should send a message to: lyris@list.bellevuecollege.edu. In the body of your message write SUBSCRIBE bccbusiness

Social Science policies can be viewed at <https://bellevuecollege.edu/socsci/policies.asp>

Leslie Lum
Fall 2015 Course Syllabus

Module	Knowledge DESCRIBE what the following are:	Comprehension IDENTIFY	Application USE	ANALYZE (hand, TI-83 and Excel)	CREATE (using Excel) TEAM PROJECT	EVALUATE
MODULE 1 Communicating Data Read 1.1, 1.2, 1.3, 1.4, 1.5, and 1.6 Read 2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 2.7, 2.8	descriptive and inferential statistics	Classify data by qualitative, quantitative, continuous, discrete, nominal, ordinal, interval and ratio	Calculate mean, median, mode, variance, min, max, range, standard deviation, percentile, or z-score for a data set of up to 25.	Interpret mean, median, mode, variance, standard deviation, percentile, z-score relative to each other and what they mean for the population.	Select a set of more than 50 data.	Compare and analyze various kinds of visual display of data.
	sample, random qualitative and quantitative data	Identify mean, median and mode in a data set	Create a histogram, pie chart, scatter plot, or stem leaf with proper labeling from a data set of up to 25.		Generate descriptive statistics on Excel and interpret what it says about the data set.	Compare and contrast measures of central tendency and variation and their implications to the data.
	continuous and discrete nominal, ordinal, interval and ratio data	Identify minimum, maximum, range	Hand calculate simple linear regression including correlation and R square for a data set of up to 12.		Organize visual display to effectively communicate what the data shows.	Predict from visual display.
	histogram, pie chart, scatter plot, simple linear regression, box plot and stem leaf	Describe what a histogram, pie chart, scatter plot, box plot and stem leaf shows.				Identify the limitations of data.
	mean, median, mode	Describe what a linear regression is.				
	minimum, maximum, range, standard deviation (sum of squares)					
	Percentile, z-score, outliers					
	Skewness, kurtosis					
	Summation					
MODULE 2 Describing populations Read 4.1, 4.2,	General discrete probability distributions. (Expected value or mean,	Describe general discrete probability distribution. Give the formula for the mean/expected value and	Create a general discrete table from data, plot the graph, calculate the mean	Place mean and standard deviation on general discrete probability plot.	Create probability distributions. Construct normality plot.	Compare discrete distributions. Evaluate normality.

BA 240 Statistical Analysis
Leslie Lum
Fall 2015 Course Syllabus

4.3, 4.4 Read 5.1, 5.2, 5.3, 5.4	standard deviation)	the standard deviation.	and standard deviation.	Calculate binomial. Apply the empirical rule.	Calculate probability for various z-scores.	
	Binomial probability distribution (mean and standard deviation).	List the three conditions of a binomial distribution. Give the formula for binomial, mean, and standard deviation.	Create a binomial table from data, plot the graph, calculate the mean and standard deviation.			
	Trees (Bayesian).					
	Normal probability distribution.	Explain the empirical rule and how it relates to normal distributions.	Identify normal probability distributions and do tests for normality.			
	Standard normal curve.		Calculate x and z and find probabilities using the z-table.			
MODULE 3 Estimation Read 6.1, 6.2, 6.3 7.1, 7.2, 7.3, 7.4, 7.5	Define central limit theorem, standard error, and sampling error. Define confidence level, alpha, and confidence intervals. Define margin of error. Explain what a t distribution is and when you use it.	Describe the central limit theorem and the relationship between the population and the sample means curve. Define standard error. Define confidence interval. Define sampling error.	Identify which should be used in large sample, small sample and large sample proportion. Apply t distribution and probability. Identify the margin of error. Describe the effect that sample size has on accuracy.	Calculate probability for the sample means curve. Calculate confidence intervals. Differentiate between t and z distributions. Calculate the sample size necessary for a margin of error.	Interpret confidence intervals. Evaluate whether two populations are the same.	Evaluate and interpret polls. Identify the limitations of polls. Evaluate the predictive quality of polls.
MODULE 4 and 5 Hypothesis testing Read 8.1, 8.2, 8.3, 8.4, 8.5, 9.1, 9.2, 9.3,	Null hypothesis. Alternate hypothesis. Alpha. One-tail Two-tail One population Two population	Define null. Define alternate. Type 1 and type 2 error. Setting alpha. Decision rule. Critical z or t.	Classify problem as large, small, proportion, pooled variance and unequal variance. Identify critical z or t.	Calculate test statistic. Find p-value.	Interpret test statistic. Evaluate p-value.	Analyze the cost of type 1 and type 2 error. Evaluate and improve on actual studies.

BA 240 Statistical Analysis
Leslie Lum
Fall 2015 Course Syllabus

9.4, 9.5	Critical t or z p-value					
Analysis of Variance More than two populations Read 10.1, 10.2, MODULE 6	Null hypothesis Alternate hypothesis Test statistic (F statistic)	Define null. Define alternate. F-statistic.	Classify as one or two factor ANOVA. Checking ANOVA assumptions.	Calculate F-statistic. Find p-value.	Interpret test statistic. Evaluate findings.	Evaluate use of ANOVA and follow-on tests.
Multiple Regression Read 11.1, 11.2, 11.3, 11.4, 11.5, 11.6, 11.7, 11.8 12.1, 12.2, 12.3, 12.4	Dependent variable. Independent variable. Intercept Slope Residual Correlation R square Prediction Prediction interval Confidence interval Assumptions (mean equal 0, variance equal, variance constant, normal) Outlier removal	Identify, define and discuss intercept, slope, residual, correlation, r- square.	Identify if regression is appropriate for the data. Describe the relationship between x and y.	Calculate intercept, slope, correlation, Rsquare, prediction, prediction interval, confidence interval.	Interpret results.	Evaluate if data transformation is necessary. Provide predictions from the analysis.
Chi-square Read 13.2, 13.3, 13.4	Contingency table Null hypothesis Alternate hypothesis Test statistic Observed frequency Expected frequency	Identify null and alternate		Calculate expected frequency. Calculate chi-square.	Interpret results.	Evaluate the usefulness of test.
