Course Description

In this Intro to Sociology class we will examine concepts and theoretical frameworks that govern our current systems. We will examine concepts such as capitalism, political ideologies, and constructs of religion, race, culture, gender, class and inequality. By examining these constructs, we will better understand systems of hierarchy, stratification and communal regulations that impact our daily lives. Seeking to understand and question our own positionality and how our own multi-layered identities help us view the world in regards to pollution, Aids epidemic, poverty, political corruption so we can then begin the process of becoming active participants in the process of change.

We will be using the **required texts** in connection with outside articles and other educational tools to create an academic framework that allows us to question. Questioning is fundamental in the process of learning therefore, we must begin to question the ways of the world if we are ever going to change them.
