COURSE OBJECTIVES AND CONTENT:

The course is designed to make students aware that the objective of Criminology is the development of a body of general and verified principles and of other types of knowledge regarding the process of law, crime, and treatment or prevention. These bodies of knowledge are constructed from study and analysis conducted in accordance with the scientific principles of research methodology.

To accomplish these broad objectives, the course will be divided into three parts. Each part is necessary in order to adequately study crime and the theories that explain it.

1. The first part of the course will be dedicated to understanding what criminology is and how it came to be something that we study.

2. Second, we will examine all of the major theories in criminology. These theories explain crime as a social phenomena and individual criminal behavior in many different ways. Some theories explain criminal behavior as a deficiency in the individual, while others explain that crime occurs because of inadequacies within society.

3. The course will end with a more applied approach to study of crime. We will discuss different types of crime, and how these types can be explained using our theories from the previous section.

4. We will study various serial killers through video, discussion, and other sources. By looking at the criminological theories and applying if these theories give us any insight into serial killers lives/minds/background.

At the end of the course, you should have a good understanding of crime and criminology. This knowledge will enable you to view the relevant issues surrounding the question of criminal behavior from more than one perspective.
