

**BA 240 Statistical Analysis**  
**Leslie Lum**  
**Winter 2016 Course Syllabus**

**Schedule**

(Subject to adjustment – changes will be announced on [bc.instructure.com](http://bc.instructure.com) – check the site often for announcements or extra credit opportunities)

Week	Topics	Monday	Wednesday	QUIZZES are given on Wed in the last 20 minutes of class
<b>Jan 4</b>	MODULE 1 Read Describing data 1.1, 1.2, 1.3, 1.4, 1.5. and 1.6 Read 2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 2.7, 2.8		HW 1 - 1.12, 1.14, 1.18, 1.24 (Classify scale as well)  Solution manuals are available in the Library Media Center and the Business Study Center C207  Text data files are on <a href="http://bc.instructure.com">bc.instructure.com</a>	<b>Quiz 1 (Data classification, Worksheet A summation)</b>
<b>Jan 11</b>	MODULE 1 MODULE 2 Read Probability 3.1,3.4, 3.5, 3.6, 3.7 Read Discrete Probability Distributions 4.1, 4.2, 4.3, 4.4	HW 2- 2.57, 2.67, 2.83 Create table with reasonable intervals and frequency, relative frequency and cumulative frequency. Plot stem leaf. Calculate mean, median, mode, variance and standard deviation.	HW 3 - 2.166, 2.175, and 2.176 Create table with reasonable intervals and frequency, relative frequency and cumulative frequency. Plot stem leaf. Calculate mean, median, mode, variance and standard deviation. Complete five number summary.	<b>Quiz 2 (Homework)</b>
<b>Jan 18</b>	Module 2 Read Normal distributions 5.1, 5.2, 5.3, 5.4	HOLIDAY	HW 4 - General Discrete 4.22, 4.36, 4.114 In addition to answering question, plot the entire distribution and show mean and plus and minus 3 std on graph. <b>Team Contract Jan 20</b>	<b>Quiz 3 (Worksheet B General Discrete/Binomial)</b>
<b>Jan 25</b>	MODULE 2	HW 5 - Binomial 4.60, 4.61, 4.62 In addition to answering question, plot the entire distribution and show mean and plus and minus 3 std on graph.	HW 6 - Normal 5.42, 5.56, 5.60. For all problems, plot the distribution and show mean and plus and minus 3 std on curve on graph. <b>Test Review: (Must be completed as above) 4.18, GD 4.35, 4.57, BI 4.59, 4.116, 4.117, 4.119 5.111, 5.119, 5.117, 5.121, 5.124</b> Extra Homework credit 1 point for any test review problems prepared last class BEFORE exam up to 20 points for quarter.	<b>Quiz 4 (Regression/Normal – Worksheet C and D)</b>

**BA 240 Statistical Analysis**  
**Leslie Lum**  
**Winter 2016 Course Syllabus**

<b>Feb 1</b>	MODULE 3 Read Central Limit - 6.1, 6.2, 6.3	EXAM 1		
<b>Feb 8</b>	Confidence Interval - 7.1, 7.2, 7.3, 7.4, 7.5	HW 7 - Central Limit 6.38, 6.58, 6.64 Plot the distribution and show mean and plus and minus 3 std on curve on graph	HW 8 - Large sample mean confidence interval Large 7.16, 7.21, 7.22 Small 7.37, 7.38, 7.39 Calculate to actual lower and upper value and INTERPRET correctly.	<b>Quiz 5 (Worksheet E and Confidence interval)</b>
<b>Feb 15</b>	MODULE 3	HOLIDAY	HW 9 - Prop. 7.50, 7.54, 7.56 Calculate to actual lower and upper value and INTERPRET correctly. Sample size 7.70, 7.72, 7.74	<b>Quiz 6 (Confidence Interval)</b>
<b>Feb 22</b>	MODULE 4 Read One population hypothesis testing - 8.1, 8.2, 8.3, 8.4, 8.5.	HW 10 - Large 8.32, 8.34, 8.46 Small 8.64, 8.68, 8.117  For all problems, draw curve, show null hypothesis curve including mean, areas of rejection, decision rule, calculation of test statistic, and draw critical value and p- value. Correct form for conclusion.	HW 11 - Prop 8.80, 8.84.8.86 For all problems, draw curve, show null hypothesis curve including mean, areas of rejection, decision rule, calculation of test statistic, and draw critical value and p-value. Correct form for conclusion. <b>Test Review problems – must be completed as above: 7.89,7.90, 7.91, 7.92, 7.93, 7.94, 7.99, 7.103, 7.75, 7.77, 7.79 8.145, 8.130, 8.131, 8.135, 8.138, 8.139, 8.144</b>	<b>Quiz 7 (Worksheet F)</b>
<b>Feb 29</b>	MODULE 4 and start Module 5 Read: Two populations 9.1, 9.2, 9.3, 9.4, 9.5	Exam 2	<b>Individual Project Due Feb 24</b>	
<b>Mar 7</b>	MODULE 5 More than two populations 10.1, 10.2	HW 12 - Large sample 9.14, 9.110 Pooled Variance 9.20, 9.28, 9.134 For all problems, draw curve, show null hypothesis curve including mean, areas of rejection, decision rule, calculation of test statistic, and draw critical value and p- value. Correct form for conclusion.	HW 13 - Paired 9.41, 9.42, 9.46, Prop 9.58, 9.62, 9.66 For all problems, draw curve, show null hypothesis curve including mean, areas of rejection, decision rule, calculation of test statistic, and draw critical value and p-value. Correct form for conclusion.	<b>Quiz 8 (Worksheet G)</b>

**BA 240 Statistical Analysis**  
**Leslie Lum**  
**Winter 2016 Course Syllabus**

<b>Mar 14</b>	MODULE 5 and 6 Read Multiple Regression and Chi Square 11.1, 11.2, 11.3, 11.4, 11.5, 11.6, 11.7, 11.8 12.1, 12.2, 12.3, 12.4	HW 14 - ANOVA: 10.66, 10.67 For problems, state hypothesis, the decision rule, show calculation of test statistic, and conclusion including p-value	Test Review: (Must be completed as HW 13 and 14) 9.112, 9.113, 9.115, 9.117, 9.118, 9.120, 9.121, 9.122, 9.123, 9.125, 9.127, 9.130,  Multiple Regression Final Project due March 16	Quiz 9 (Worksheet H, ANOVA)  Final March 23 at 11:30 am
---------------	---	--	--	---

**Course Requirements**

	Weight	Your score
Individual exams are two pages of notes (4 sides 8 ½ X 11) which may NOT include the practice exams which must be turned in with the exam. You may use a calculator. Electronics of any kind are prohibited. 2 exams (100 each) and one comprehensive final (125)	325	
Regression Project. Detailed instructions and project template on Canvas course site	100	
Quizzes (20 points each) 20 minutes in class in the last half hour of Wednesday (No makeups – highest 8 of 9 taken)	160	
Worksheets, participation and attendance. (These will be specified in class) If you miss class, come late or leave early, you will lose attendance points.	80	
Homework. You must be <u>in class</u> to get credit for the homework. <u>Homework is due at the beginning of class.</u> Extra credit for doing test review questions due at the beginning of the class BEFORE the date of the exam. (No late homework accepted - 2 grace homeworks given)	120	
Extra credit – 5 points for attending approved college speakers and writing a 500-word paper due one week after the event.		
<b>TOTAL</b>	<b>785</b>	

**BA 240 Statistical Analysis**  
**Leslie Lum**  
**Winter 2016 Course Syllabus**

**Math 138 is required for this course. BA 240 transfers as STATS 311 at UW and is a rigorous 300 level course that requires your full participation in class and on your own time.**

<b>Time and place</b>	<b>Time: Monday/Wednesday 12:30 to 2:40 pm</b>
<b>Contact</b>	Telephone: 425-564-4063 Email: <a href="mailto:llum@bellevuecollege.edu">llum@bellevuecollege.edu</a> I will try to respond within 48 hours. <b><u>BE SURE TO PUT BA 240 IN SUBJECT HEADING OF EMAIL FOR MORE TIMELY RESPONSE.</u></b>
<b>Office hours</b>	<b>Office Location C207</b> <b>Lum Office Hours: MW 9:30 am T TH 10:30 am</b>
<b>Websites</b>	<b>All practice exams keys and assignments are placed on the <a href="http://bc.instructure.com">bc.instructure.com</a> class website.</b> <b>Extensive videos and other materials are linked below</b> <b>Complete instructions on the Project are on <a href="http://bc.instructure.com">bc.instructure.com</a> in the Project file.</b>
<b>Required Texts</b>	<b><u>Statistics</u></b> by McClave and Sincich, Pearson/Prentice Hall 2006 (This book may be rented from the bookstore) The <b>textbook data files</b> are posted in a zip file in the <a href="http://bc.instructure.com">bc.instructure.com</a> course website. All problem files are under Exercises. To use, open Excel first and then in the drop down menu right above the Cancel button, go to the top for All Files (*.*). Browse to find the text data files and open it. You may have to format the file into columns before using it. Calculator that can calculate standard deviations. No electronics are allowed in class. Your undivided attention is needed to get through the material.
<b>Other Requirements</b>	
<b>Goals</b>	<ul style="list-style-type: none"><li>• Research and understand the nature of information and large data sets.</li><li>• Calculate solutions to statistical problem sets including measures of central tendency, measures of variability, probability, binomial distributions, normal distributions, confidence intervals, hypothesis testing, correlation, and regression.</li><li>• Use software to solve statistical problems.</li><li>• Communicate data effectively with written and visual display.</li><li>• Apply statistical analysis to real data including framing the problem, sorting data, selecting appropriate statistical formulae, and coming up with relevant conclusions.</li><li>• Work in teams to complete projects.</li></ul>
<b>Resources</b>	The solution manual is available at the Business Study Center in C207K. The best students <b>make extensive use of the study center</b> . Check C207K for hours. <b>Review sessions</b> may be scheduled prior to exams. These are often conducted by instructors in other sections. Attend the review sessions to help you do better in the exams.
<b>How to succeed in this course</b>	<ul style="list-style-type: none"><li>– This course requires that you work in teams for a project. Teams will be selected by the instructor and you will be expected to behave according to professional workplace standards in dealing with your team members. This includes in-class, out-of-class, and in email communication.</li><li>– <u>Review all materials for a module answering the questions on your reading guide BEFORE we cover the module.</u> You will be tested on your reading on the individual and team RAT.</li><li>– We will spend two to three sessions on each module applying the concepts that you have learned.</li><li>– The Team Project requires that you apply what you learn to real problems or issues. This requires that you apply research, analysis and evaluation skills that will be required in your professions. Your grade on the team project will be adjusted based on peer evaluation.</li></ul> You must take <b>personal responsibility</b> for your learning to succeed in life:

**BA 240 Statistical Analysis**  
**Leslie Lum**  
**Winter 2016 Course Syllabus**

- Attend all classes and participate fully in the team process
- Use the reading guide to read textbook sections, view video lectures and do homework before and during Module work WITHOUT the solution guide.
- Help your team members learn. You learn the most when you teach others the concepts.
- Do test review and worksheet
- Do practice exams without consulting key

**Grading**

93 - 100%	A	4
90 - 92	A-	3.7
86 - 89	B+	3.3
83 - 85	B	3.0
80 - 82	B-	2.7
76 - 79	C+	2.3
73 - 75	C	2.0
70 - 72	C-	1.7
66 - 69	D+	1.3
60 - 65	D	1.0
Below 60	F	0

**A pass grade will not be given unless all requirements of the course are completed.**

**Standard of Behavior**

All interactions will be evaluated as to whether they are acceptable in the business environment. This includes interactions in the class, on online discussion forums, email communications, with the instructor, with fellow students, and in the community. Inappropriate communications include jokes and discussions your classmates find offensive, excessive messages, and other communications which would be typically deemed inappropriate in the workplace. The student will be informed and expected to comply with requests for change and improvement. Cell phone and laptops are not to be used in the class.

**Student Code**

Cheating includes, but is not limited to, copying answers on exams, glancing at nearby exams, turning in assignments or papers that have been used in other classes, and giving or receiving help during an exam. Cheating includes, but is not limited to, purchasing or selling notes, assignments or examination materials. Having a cell phone in view for any reason during an exam will result in a zero in the exam.

Stealing includes, but is not limited to, taking the text, notes, exams, library books or other personal property of others without their permission.

Plagiarism is presenting the words, ideas, and/or work of others as if it is an individual's own work. It includes, but is not limited to, using other's papers as one's own and including parts of published works without giving credit where credit is due.

If you choose to cheat, steal or plagiarize, or if you assist anyone in cheating, the following actions will be taken:

You will receive zero on the assignment or assessment.

A report of the incident will be forwarded to the Dean of Student Services. He/she may file the report in your permanent record and/or take further disciplinary action.

If you feel you have been unfairly accused of any of the above, you may appeal. For a description of due process, see WAC 132H-120, available in the Dean's office.

“Cheating, stealing and plagiarizing (using the ideas or words of another as one's own without crediting the source) and inappropriate/disruptive classroom behavior are violations of the Student Code of Conduct at Bellevue College. Examples of unacceptable behavior include, but are not limited to: talking out of turn, arriving late or leaving early without a valid reason, allowing cell phones/pagers to ring, and inappropriate behavior toward the instructor or classmates. The instructor can refer any violation of the Student Code of

**BA 240 Statistical Analysis**  
**Leslie Lum**  
**Winter 2016 Course Syllabus**

Conduct to the Vice President of Student Services for possible probation or suspension from Bellevue College. Specific student rights, responsibilities and appeal procedures are listed in the Student Code of Conduct, available in the office of the Vice President of Student Services." The Student Code, Policy 2050, in its entirety is located at:

[http://bellevuecollege.edu/policies/2/2050\\_Student\\_Code.asp](http://bellevuecollege.edu/policies/2/2050_Student_Code.asp)

- Affirmation of Inclusion** Bellevue Community College is committed to maintaining an environment in which every member of the campus community feels welcome to participate in the life of the college, free from harassment and discrimination. We value our different backgrounds at BC, and students, faculty, staff members, and administrators are to treat one another with dignity and respect.
- Code of Honor** By being a student in this course you acknowledge that you are a part of a learning community at Bellevue College that is committed to the highest academic standards. As a part of this community, you pledge to uphold the fundamental standards of honesty, respect, and integrity, and accept the responsibility to encourage others to adhere to these standards.
- Accommodations** The Disability Resource Center serves students with a wide array of learning challenges and disabilities. If you are a student who has a disability or learning challenge for which you have documentation or have seen someone for treatment and if you feel you may need accommodations in order to be successful in college, please contact DRC as soon as possible.
- If you are a person who requires assistance in case of an emergency situation, such as a fire, earthquake, etc, please meet with your individual instructors to develop a safety plan within the first week of the quarter.
- The DRC office is located in B 132 or you can call at 425.564.2498. Deaf students can reach us by video phone at 425-440-2025 or by TTY at 425-564-4110. Application information and other helpful links at [www.bellevuecollege.edu/drc](http://www.bellevuecollege.edu/drc)
- Public Safety** The Bellevue College (BC) Public Safety provides personal safety, security, crime prevention, preliminary investigations, and other services to the campus community, 24 hours per day, 7 days per week. Their phone number is 425.564.2400. Public Safety is located in K100 and on the web at: <http://bellevuecollege.edu/publicsafety/> for campus emergency preparedness information, campus closure announcements and critical information in the event of an emergency.
- Participating in Business Learning Community** If you intend to and have not already done so, declare your business major. Make sure you have consulted with an advisor and laid out your courses. The Business Transfer Program recommends that you subscribe to the Bellevue College Business Leadership Club to keep current on events and support for your business school application.

**BA 240 Statistical Analysis**  
**Leslie Lum**  
**Winter 2016 Course Syllabus**

Module	Knowledge DESCRIBE what the following are:	Comprehension IDENTIFY	Application USE	ANALYZE (hand, TI-83 and Excel)	CREATE (using Excel) TEAM PROJECT	EVALUATE
<b>MODULE 1</b> <b>Communicating Data</b> Read 1.1, 1.2, 1.3, 1.4, 1.5, and 1.6 Read 2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 2.7, 2.8	descriptive and inferential statistics sample, random qualitative and quantitative data continuous and discrete nominal, ordinal, interval and ratio data histogram, pie chart, scatter plot, simple linear regression, box plot and stem leaf mean, median, mode minimum, maximum, range, standard deviation (sum of squares) Percentile, z-score, outliers Skewness, kurtosis Summation	Classify data by qualitative, quantitative, continuous, discrete, nominal, ordinal, interval and ratio  Identify mean, median and mode in a data set  Identify minimum, maximum, range  Describe what a histogram, pie chart, scatter plot, box plot and stem leaf shows.  Describe what a linear regression is.	Calculate mean, median, mode, variance, min, max, range, standard deviation, percentile, or z-score for a data set of up to 25.  Create a histogram, pie chart, scatter plot, or stem leaf with proper labeling from a data set of up to 25.  Hand calculate simple linear regression including correlation and R square for a data set of up to 12.	Interpret mean, median, mode, variance, standard deviation, percentile, z-score relative to each other and what they mean for the population.	Select a set of more than 50 data.  Generate descriptive statistics on Excel and interpret what it says about the data set.  Organize visual display to effectively communicate what the data shows.	Compare and analyze various kinds of visual display of data.  Compare and contrast measures of central tendency and variation and their implications to the data.  Predict from visual display.  Identify the limitations of data.
<b>MODULE 2</b> <b>Describing populations</b> Read 4.1, 4.2,	General discrete probability distributions. (Expected value or mean,	Describe general discrete probability distribution. Give the formula for the mean/expected value and	Create a general discrete table from data, plot the graph, calculate the mean	Place mean and standard deviation on general discrete probability plot.	Create probability distributions. Construct normality plot.	Compare discrete distributions. Evaluate normality.

**BA 240 Statistical Analysis**  
**Leslie Lum**  
**Winter 2016 Course Syllabus**

<p><b>4.3, 4.4</b>  <b>Read 5.1, 5.2, 5.3, 5.4</b></p>	<p>standard deviation)</p> <p>Binomial probability distribution (mean and standard deviation).</p> <p>Trees (Bayesian).</p> <p>Normal probability distribution.</p> <p>Standard normal curve.</p>	<p>the standard deviation.</p> <p>List the three conditions of a binomial distribution. Give the formula for binomial, mean, and standard deviation.</p> <p>Explain the empirical rule and how it relates to normal distributions.</p>	<p>and standard deviation.</p> <p>Create a binomial table from data, plot the graph, calculate the mean and standard deviation.</p> <p>Identify normal probability distributions and do tests for normality.</p> <p>Calculate x and z and find probabilities using the z-table.</p>	<p>Calculate binomial. Apply the empirical rule.</p>	<p>Calculate probability for various z-scores.</p>	
<p><b>MODULE 3</b>  <b>Estimation</b>  <b>Read 6.1, 6.2, 6.3</b>  <b>7.1, 7.2, 7.3, 7.4, 7.5</b></p>	<p>Define central limit theorem, standard error, and sampling error.</p> <p>Define confidence level, alpha, and confidence intervals.</p> <p>Define margin of error.</p> <p>Explain what a t distribution is and when you use it.</p>	<p>Describe the central limit theorem and the relationship between the population and the sample means curve.</p> <p>Define standard error.</p> <p>Define confidence interval.</p> <p>Define sampling error.</p>	<p>Identify which should be used in large sample, small sample and large sample proportion.</p> <p>Apply t distribution and probability.</p> <p>Identify the margin of error.</p> <p>Describe the effect that sample size has on accuracy.</p>	<p>Calculate probability for the sample means curve.</p> <p>Calculate confidence intervals.</p> <p>Differentiate between t and z distributions.</p> <p>Calculate the sample size necessary for a margin of error.</p>	<p>Interpret confidence intervals.</p> <p>Evaluate whether two populations are the same.</p>	<p>Evaluate and interpret polls.</p> <p>Identify the limitations of polls.</p> <p>Evaluate the predictive quality of polls.</p>
<p><b>MODULE 4 and 5</b>  <b>Hypothesis testing</b>  <b>Read 8.1, 8.2, 8.3, 8.4, 8.5.</b>  <b>9.1, 9.2, 9.3,</b></p>	<p>Null hypothesis.</p> <p>Alternate hypothesis.</p> <p>Alpha.</p> <p>One-tail</p> <p>Two-tail</p> <p>One population</p> <p>Two population</p>	<p>Define null.</p> <p>Define alternate.</p> <p>Type 1 and type 2 error.</p> <p>Setting alpha.</p> <p>Decision rule.</p> <p>Critical z or t.</p>	<p>Classify problem as large, small, proportion, pooled variance and unequal variance.</p> <p>Identify critical z or t.</p>	<p>Calculate test statistic.</p> <p>Find p-value.</p>	<p>Interpret test statistic.</p> <p>Evaluate p-value.</p>	<p>Analyze the cost of type 1 and type 2 error.</p> <p>Evaluate and improve on actual studies.</p>
