The Game of Global Business

Course Description: Surveys international business and trade. Students focus on the inter-relationships among technology, culture, law, and economics in the contemporary world. As a case study, we will be looking at a PESTLE (politics, economics, social, technological, legal and environmental issues) analysis in terms of the platform Minecraft® which was acquired by Microsoft® in 2014. This will allow us to look at global business through the game industry. Then, students will study individual countries with presentations and brief papers.

Outcomes:

- Describe how political, economic, and socio-cultural forces have influenced and continue to influence the international business environment.
- Critically evaluate international business practices through the lens of ethical and social responsibility, including with regards to environmental sustainability.
- Communicate effectively both orally and in writing regarding international business issues.
- Think critically and creatively about international business processes.
- Work cooperatively in teams to complete assigned projects.

Required texts and materials: Coursepack to be purchased at bookstore for less than \$10. Can't beat that.
