Course Outcomes

- Be able to evaluate economic examples as they related to personal incentives and to recognize the key concept of opportunity cost.
- Be able to set-up and identify, both graphically and in words, a competitive market model's associated components and outcomes (demand, supply, price, equilibrium) and their link to utility theory, and various production decisions
- Be able to calculate both marginal and average costs for a variety of data sets and be able to use them appropriately within decision-making evaluations of choices.
- Understand the value of the competitive market model's outcome as a benchmark for evaluating more realistic models of industrial organization such as Monopoly and other types of markets.
- Recognize and apply 'economic thinking' to various policy issues and applied problems, incorporating appropriately both positive and normative elements of analysis, with measures of efficiency and equity.
- In addition, students may be introduced to a subset of the following:
 - Elasticity as a measure of quantity's responsiveness to changes in prices or income
 - Maximizing behavior and the limitations of rationality assumptions for households (as consumers), firms (as producers); indifference curves and budget constraints.

How Outcomes will be met

We will be flexible about this schedule, but this will help us to structure the class, also check the calendar in the last page of this syllabi. We will have five sessions a week, here are the plan of the class sessions tentatively:

- | | |
|--------|---|
| Day-1: | Lecture (chapter coverage see below for the schedule) |
| Day-2: | continued lecture with some examples and problem-solving exercises |
| Day-3: | In-class group exercises (teamwork), followed by weekly Quiz (15-20 multiple-choice questions) for 25-30 minutes |
| Day-4: | Alternately, discuss current news/articles or documentary DVD presentation (30-minute), followed with answering a few key questions in the form of mini essays. |

There will be **two** 50-minute exams during the quarter, about eight quizzes, and ten group exercises.

The 50-minute exams each will consist of 33 multiple-choice questions (for schedules, look up the course calendar, at the end of this syllabus), and each exam will cover only the segment of each period. Please do not miss an exam, quiz or group exercises. If it is an emergency, **you must notify me beforehand, and bring a written document.**

Grading

Each of your work will graded with 100 point-base and then will be taken in percentage as follows:

		A	92-100
Teamwork/Participation	10%	A-	88-91.9
Quizzes (5)	20%	B+	84-87.9
Group Exercises (5)	20%	B	80-83.9
Exam-1	15%	B-	76-79.9
Exam-2	15%	C+	72-75.9
Last Quiz	10%	C	68-71.9
Essays (2)	10%	C-	65-67.9
Total	100%	D+	60-64.5
		D	56-59.5

There will be no “extra-credit” assignments, in consideration that you will have enough assignments to improve your grade (quiz and group exercise) throughout the term. Your grade reflects your understanding of the chapter readings and lectures, and the time and efforts that you put into it. Including in the participation is (not only attendance) but also in solving exercise problems, which you will be asked in turns.
