PSYCHOLOGY 205
THEORIES OF PERSONALITY
ITEM 5451, SECTION OAS
COURSE SYLLABUS

Course Format:

Psychology 205 will be taught entirely on-line, with no face to face meetings and no on campus exams. Students are required to read text chapters and overviews, participate in a weekly discussion forum, submit assignments, and take exams, all online. The site is open 24/7 for your convenience. **It is expected that if you go out of town you will find a way to access the Internet** (Internet cafes, hotel offices, public libraries, etc.) in order to sustain your participation.

EXAMS:

There will be five (5) exams, each worth 100 points. Each exam will cover information from the text, overviews, and discussions. The test format may contain multiple choice, fill-in-the-blank, short answer, or essay questions. Anything covered in the class, including discussions and assignments, should be considered testable information. *There will be no comprehensive final exam.*

DISCUSSIONS:

The discussion forum is the heart of the course and is intended to increase your experience as a learning community as well as deepen your understanding and thinking about the subject matter. New topics and discussion questions will be presented at the beginning of each week. Specific details on how to write discussion responses are available under 'Discussion Instructions' in the 'Getting Started' Folder.

There will be ten weekly discussion sessions running from Wednesday to Wednesday of every week. Students will generate a response to each of the weekly discussion questions corresponding to a specific stage of development. Students will also respond to two other students who have posted their individual replies to the weekly discussion question. In addition, students will post an online personal introduction at the start of the course.

PERSONALITY MEASUREMENT ASSIGNMENTS:

Part of the study of personality is focused on how personality characteristics are measured. In each module, you will find one or more links to online personality tests that will help you understand more about the process of measurement as well as provide you with interesting information about yourself. The links to the measurements as well as instructions for the write-ups for each of these assignments will be found in the course content modules. There will be nine of these personality measurement assignments required over the course of the quarter.

THEORETICAL ANALYSIS ASSIGNMENT:

This paper is designed to help you integrate some of the concepts that we have studied so far. Students will do this by viewing an episode of *Real World* and completing an analysis of two of the characters. Students will be asked to discuss the personalities of the characters and their relationship from a specific theoretical perspective covered in this class. Complete instructions for this assignment will be found in Module 3.

VISION QUEST ASSIGNMENT:

This exercise is designed to help students synthesize a variety of concepts related to psychology and personality theory. The assignment is based on some of the features of a traditional "vision quest" in which an individual wanders or travels on a journey seeking personal insight. After going on your own quest, students will be asked to write about their insights and apply course material to the experience. Complete instructions for this assignment will be found in Module 5.
