## Course Catalog Description

Investigate the human social condition, and develop a useful way to think critically about the world around you. Themes include power dynamics, culture, the development of self in society, deviance, stereotyping, and/or the social construction of knowledge.

## Course Content

Sociologists study a broad range of topics--some of which includes provocative content and adult themes. While every attempt will be made to keep things PG-13, please know that there will be times where R-rated content (language, images, etc.) is necessary to examine course topics within an academic context. Students will not be penalized for excusing themselves from content they find objectionable or difficult to watch, see, discuss or listen to. That being said, students who excuse themselves are responsible for any course material they miss as a result of choosing not to participate. If you have any questions or concerns about course content or classroom climate, feel free to speak with me about it at any time. I am not punitive, I am here to support you. Come talk to me during office hours or email me.

*NOTE: When emailing, please put MW 3--[your name] in the subject line so that I can easily identify you and quickly respond.*

**Classroom Theme/Pedagogical Approach**

Video selections and music will be prominently featured in this class and will be used to illustrate course topics and themes. All multimedia selections are chosen for their ability to make you think and therefore, inspire engaging classroom conversations. No one will be put on the spot, but please be prepared to participate in class discussions. Critical thinking is the goal.

This course is paperless and uses many different online, internet based tools to support classroom management and enhance student learning. Students in this section of SOC 101 will need to have stable and consistent internet access along with a working Bellevue College email account (^see notes below for access information). Further, students in this class will be accessing a few different websites:

2. A critical idea of society and community, including where in your social landscape you live, and how you observe those around you.
3. A general knowledge and comprehension of how social, political, and cultural forms of power are played out, and how some folks perceive those experiences.
