Course Description

This course provides the major theories, concepts, and terminology of macroeconomics. It also examines the application of policies to various macroeconomic conditions and analyzes their impact on unemployment, inflation, gross domestic product and international trade.

Required Textbook

David Colander, Macroeconomics, 6th Edition, McGraw-Hill Irwin Publishing, 2006.

Course Objectives

By the end of the quarter, students will be able to accomplish the following:

1. Identify reliable sources and be able to calculate, analyze and evaluate macroeconomic outcomes, such as inflation, unemployment, economic growth, and trade and payment balances.
2. Use economic reasoning and principles to compare and evaluate possible causes of and solutions for macroeconomic instability.
3. Recognize the influence and importance of value judgements with regard to macroeconomic problems.
4. Identify and describe the major institutions through which macroeconomic policies are implemented.
5. Explain the evolution of U.S. capitalism from the Great Depression to the present and identify the major trends in economic policy.
6. Explain the major traditions of economic thought, and development policies of developing nations and the challenges surrounding their implementation.

Class Attendance and Participation

Attendance and active participation in class discussions and problem solving are essential in the learning process. Active participation means to come to class prepared by reading the assigned material, have questions, comments and generate discussion topics on current economic issues.

Each new class builds on the foundation developed in the previous class. Therefore, consistent attendance is essential to your success in this course. If for any reason, you miss a class, it is your responsibility to see me and to find out how to make up the material you missed.

Course Structure

In-class Assignments/Teamwork

The class will be divided into teams. Each team will have five to six members. You will have questions to answer as a team and turn in a summary of your answers, for 100 points over the course of the quarter. A student must be present to get credit. The objective of teamwork is to learn through interactions with your peers and enhance understanding of the course material.

Exams

Over the course of the quarter there will be two one-hour exams, and a two-hour final exam. Exams will contain multiple choice and/or short essay questions based on the reading and lectures for that segment of the course.

Please do not miss an exam. If an emergency arises and you notify me beforehand, and you complete the rest of the course work, you may be able to make up a missed exam, which will be different from the original, and most likely extended multiple choice and essay questions.

The final exam must be taken in order to receive credit for the course.

Points

First one-hour exam	100
Second one-hour exam	100
Team Work	100
