Course Description: We live in a global village. This geography class focuses on local, regional, national and international elements of that village. As we examine issues of location and learn about places around the world, you will learn more about the relationships between people and places. We'll examine how distant cultures and societies influence each other and where resources are distributed around the globe.

An important part of this geography class involves working with students from other countries. As we listen to and learn from each other, our communication skills will be sharpened and our geographic knowledge enriched. Remember, this is your class and suggestions are welcome. Let's make the most of this quarter!!

Students with disabilities who have accommodation needs are required to contact Disability Support Services (DSS) in room B132 (phone 425-564-2498). Also, please contact me as soon as possible.

### **Due Dates and Student Responsibility**

While we will try to follow this schedule, it is subject to change.

To complete this course with a satisfactory grade you must carefully follow directions, finish all assignments on time, be prepared for the quizzes, and demonstrate a mastery of geographic concepts and readings through performance on exams, quizzes, participation in group work and on the paper. Notes from the class and readings in the textbook are probably most important for exams.

It is each student's responsibility to get any handouts, notes, or important information for any class time missed. There are also supplemental readings used during this class as handed out by the instructor.

No late work will be accepted this quarter.

Chronic tardiness and/or absences will negatively influence your grade.

Map quizzes cannot be made-up under any circumstances. However, if you miss a map quiz, all is not lost. The lowest one of the three map quizzes will be dropped.

Make-up exams must be arranged ***in advance*** with me, and only under extenuating circumstances. All make-up exams carry a 20% penalty.

Talking during class about personal issues interferes with the learning of other students and is **UNACCEPTABLE. PLEASE LEAVE THE CLASSROOM AND TALK ELSEWHERE.** Also, please turn off cell phones during class.

Cheating, plagiarism, and other forms of academic dishonesty are unacceptable at Bellevue Community College and are subject to disciplinary action and a reduced grade or failure of the class. See page six (6) of this syllabus.

Thanks for making this class successful.

**Learning Outcomes: At the end of this course successful students will be able to:**

- 1) understand the importance of the dynamic nature of place
- 2) using maps, identify physical and cultural features on a map
- 3) explain in short in-class tests weather and the dynamic nature of the atmosphere
- 4) recognize through written work and map study the spatial distribution of people
- 5) explain the dynamics of the urban environment
- 6) explain the economic components within regions and their role in determining potential values, perceptions and decision making processes in a society.
- 7) recognize the phenomena of globalization on the world community and the rapid pace and increasing scale of economic integration
- 8) analyze geographic concepts, for example the landlocked position of a country, and the implications of that on the geography of an area
- 9) Question your geographic assumptions, so your understanding of our small, yet complex, world will be enriched.
