

BA 240 – STATISTICAL ANALYSIS

SUMMER 2017 COURSE SYLLABUS

Instructor: Winnie Li
E-mail: [Please use Canvas Mail](#). Make sure you put down **BA 240** in the subject line. I have multiple classes to track through Canvas, and this helps me to organize your email (and get prompt response). Alternate email: Winnie.Li@bellevuecollege.edu
Phone: 425-564-2825
Office location: A255-G
Office Hours: By Appointment Only

COURSE INFORMATION

Surveys techniques used in decision-making and research. Topics include descriptive and inferential statistics, probability, central tendency, variability, normal and t-distributions, hypothesis testing, and regression. Material has applications in business, health care, etc.

COURSE OUTCOMES

After completing this class, students should be able to:

- Identify the relationship between data analytics and business decision-making process
- Analyze and evaluate research methodologies
- Identify the most common data analytics methods and discuss how each method best applies to specific analytics questions
- Identify the most common technological tools used in data analytics
- Evaluate business problems and determine suitable analytical methods
- Use technological tools such as Excel or R to manage data sets in various sizes and formats
- Interpret research study results and clearly state the conclusion in reports and presentations with close attention to details

PREREQUISITE:

- MATH 138 or MATH& 141 with a C or better
- Intermediate computer skills and prior experience with Word, Excel and PowerPoint are required.

BOOKS AND MATERIALS REQUIRED:

Textbook: **Statistics** 12th Edition, by McClave and Sincich, Prentice Hall 2013

Software: Excel 2007 or newer

Others: Calculator (Minimum Requirement: TI-30) and USB Flash Drive

TOPICS COVERED:

Chapter 1:	Statistics, Data, and Statistical Thinking
Chapter 2:	Methods for Describing Sets of Data
Chapter 3:	Probability
Chapter 4:	Discrete Random Variables
Chapter 5:	Continuous Random Variables
Chapter 6:	Sampling Distributions
Chapter 7:	Inferences Based on a Single Sample: Estimation with Confidence Intervals
Chapter 8:	Inferences Based on a Single Sample: Tests of Hypothesis
Chapter 9:	Inferences Based on a Two Samples: Confidence Intervlas and Tests of Hypotheses
Chapter 10:	Analysis of Variance: Campring More than Two Means (Depends on Time Availability)
Chapter 11:	Simple Linear Regression
Chapter 12:	Multiple Regression and Model Building

COURSE REQUIREMENT

THIS IS A TIGHTLY-SCHEDULED AND FAST-PACED COURSE, THE LATER MATERIALS ARE BUILT ON TOP OF THE PREVIOUS MATERIALS AND GET HARDER AND HARDER. WE HAVE NO TIME TO TAKE A BREAK OR REVISIT MATERIAL – IT IS VERY HARD TO CATCH UP IF YOU SLACK OFF.

An online class does not reduce any course requirements. Instead, it only offers you the flexibility of creating your own learning schedule. Make sure you manage your time well!!

For the first 1/3 of the course, we will cover about TWO chapters per week, then slow down to ONE chapter a week as the materials get much more complicated after Chapter 7. In the last week of the quarter, we will be very busy with the team project. See “Study Schedule” for details.

ALL due dates are posted in Canvas Calendar (some are subject to change). Students will not be given extension(s) unless they have extenuating circumstances as decided by the instructor, and students must contact the instructor 48 hours before the due date to make such arrangements.

There is a significant amount of work in this class. You are expected to spend a minimum of 15 hours per week to study and to complete the assigned work. Make sure that you can spend at least that much time this quarter. ***If you are overloaded with other courses or work, this may NOT be the right time for you to take this class. FOR YOUR BENEFIT, DO NOT OVERLOAD.***

You are expected read the course documents, textbook, books 24x7, tutors and Web resources, and use the discussion and chat tool to seek assistance from classmates and the instructor. DO NOT post files that are assigned as homework to the discussion area unless specifically directed to do so.

Check Course Website Frequently! Course Documents (including Syllabus, Updated Schedule, Lecture Notes, Homework Solution and Project Information) will be posted regularly.

GRADING COMPONENTS:

Attendance:	50 hours minimum
Assignments:	100 points
Quizzes:	90 points
Discussions:	110 points
Project:	200 points
Midterm Exam:	200 points
Final Exam:	300 points
Total	1000 points

ATTENDANCE (50 HOURS MINIMUM)

This class requires 50 hours minimum attendance on Canvas. This includes but is not limited to reading the course documents, spending on discussions, using email and chat.

FYI, the average amount of time spent on Canvas for those who passed the course is 75 hours.

ASSIGNMENTS (100 POINTS)

There are 10 homework assignments; each assignment contains 5 textbook questions (except homework 2). **Before you start working on the homework, make sure you read the lecture notes (to get a general outline), read the textbook (for details and more explanations), and watch the video lecture (for chapter review/main points).** You may find the assigned reading assignments and homework problems at the LAST couple slides (before the “END” slide) of each chapter lecture notes, as well as from the course website → Assignment

Files sent to instructor need to be named appropriately, as I need to track thousands of submissions every year. Typical format: **BA240_AssignmentXX_XXXXX.xxxx** where the first XX is the Assignment #, XXXXX is the First Five letters of your Last Name, and xxxx is the document format. Assuming I’m turning Assignment 8, which is a Word document (using office 2010 or newer), then I should name the file as: **BA240_Assignment08_Li.docx** (as I have a short last name :).

Please note:

1. Since we have just switched to this newer edition of the textbook, we are still proof reading the textbook, the accompany test bank and the solution manual. **If I notice any errors, I will make corrections in the lecture notes. Therefore make sure you treat lecture notes as the “model” if there are any “conflicts” between the textbook and the lecture notes.** Also, please feel free to let me know if you notice any errors in both the textbook or the lecture notes.
2. For lecture purpose, the slides in the video lecture are generally MORE than the PowerPoint slides posted in the course website. **Make sure you have the lecture notes ready when watching the video lectures, and be sure to take MORE NOTES!!**
3. **DO NOT expect to start reading the materials on the due date and still be able to finish the assignment on time.** Although the reading time for each chapter takes about an hour or two, it may take *many* hours to understand the materials fully. Some chapters take more than a week in a traditional on-ground class, which has over 6 lecture hours plus exercises and self-study time. Please see “Recommended Study Schedule” for details (posted in Getting Started folder). **Make sure you manage your time well.**
4. **Assignments are focused on hands-on applications.** While they are related to the concepts in the textbook and lecture notes, you most likely won’t find the detailed step-by-step instructions on how to complete each problems. ***To succeed in this area, you need to hone your skills of searching and utilizing all resources available, including but not limited to class materials, discussion board, online Q&A sessions, tutoring sessions, and internet search.***

5. Of special concern for an online course is the fact that we do not exchange paper. **So it is particularly important to FOLLOW DIRECTIONS.** One of my biggest problems (and thus yours) is with students who already know exactly what to do, so they miss many subtle points of what I ask to be done in assignments. Again, please follow directions on each assignment, particularly **the requirements in format and precision.**

You may either hand write or type your homework. If you choose to handwrite, scan your work or take picture(s) of your work when you complete it (**please make sure the resolution is CLEAR enough**). Then insert all images into a SINGLE Word Document, and you should submit only ONE file if there's no additional requirement. All assignments should be submitted through Course Tools → Assignments.

If an assignment asks you to include a **SKETCH** or a **DIAGRAM** as part of your answer, **PLEASE DO SO!!** Failure of including required diagrams will result in an automatic **loss of 50% of the credit** for that problem.

Diagrams do not need to be elaborate—a program like paint (or hand drawing) produces perfectly “adequate” graphics for these assignments.

Lateness: Any work received after the due date is considered late. **Late work will be penalized at the rate of TWO (2) points per calendar day late, including weekends/holidays, for a maximum of THREE (3) calendar days.** Students will not be given extensions unless they have extenuating circumstances as decided by the instructor (you must contact me **48 hours before** the due date to make such arrangements).

Since extreme circumstances do occur in everyone's life, each student will have a total of **3 FREE late days:**

- 1) A free late day allows you to submit an assignment up to 24 hours late without penalty. For example, you could submit an assignment due Tuesday 9pm on Wednesday by 9pm with no penalty by spending 1 free late day.
- 2) You may choose to use the late days in any way you desire. For example, you could use 2 late days on Assignment 2 and 1 late day on Assignment 5, or spending all 3 on Assignment 7.
- 3) Late days are counted by **CALENDAR DAY**, each late day may only apply to ONE assignment, and may ONLY be used on Assignments, **NOT applicable on quizzes, discussions, project or extra credit.**
- 4) Once a student has used up all 3 free late days, normal late penalty applies.
Note: If you would like to use your free late days, you must add a note along with the assignment submission. For example, put down “I would like to use one of my three free late days” under submission comment.
- 5) **NO credit** will be given after the homework solution has posted, regardless how many free late days you have left.

Resubmission: **Students are solely responsible on the assignment submission.** You may take back the assignment and resubmit it **BEFORE** the due date with no penalty. If you would like to resubmit an assignment **AFTER** the due date due to whatever reason (such as wrong file or updated work), free late days will be taken off if you have any left, and normal late penalty applies if all free late days have been used up. **It is always a good idea to DOUBLE CHECK your submission.**

QUIZZES (90 POINTS)

Quizzes must be taken at scheduled times. There are eight quizzes total, and typical formats include multiple choices and fill in blanks and short answers. Each quiz is worth 10-15 points, and is limited to 30 minutes long. In addition, you will have a Quiz 0 (which is about syllabus and general course information) and Quiz Practice (which helps you to get familiar with the Canvas grading system). **You should complete Quiz 0 and Quiz Practice AFTER you finished reading all materials under Getting Started module, but BEFORE you move to Chapter 1 module.**

Note 1: Before starting any quiz (for quiz 1 through quiz 8), make sure you download the quiz file, which can be found in Modules. Complete the quiz file by hand first, and then start the Canvas quiz to fill in your answers. Although there is no time limit when you complete quiz file by hand, **in order to better prepare the exams, you should time yourself, and make sure you complete the quiz within 30 minutes. FYI: the same quizzes are given to the on ground students during class time and are limited to 15-20 minutes only.**

Note 2: All quizzes are graded by the Canvas grading system automatically – which is quite picky and sensitive. I have prepared detailed notes and instructions for each quiz: **Please follow the instructions noted on the quiz file (on the upper left corner usually) and the notes posted in Canvas Quiz Instructions, particularly the PRECISION requirement and the FORMAT of the results. Canvas is set to ONLY accept answers in the specified format.** One of the requirements in this class is “attention to details”, which is a very important skill to have.

Note 3: No late/make-up quizzes are allowed.

DISCUSSIONS (110 POINTS)

For each assignment, there will be a follow-up discussion: pick ONE question from the homework assignment (the one you are mostly interested in), write a short paragraph to explain 1) why you are interested in it 2) how did you approach this question, solve it, and overcome any difficulties you had 3) what have you learned from this question and any comments. Alternatively, you may also choose the other option: create your own problem based on what you have learned in that chapter! ☺ You are also required to interact with your classmates in discussion – reply to at least two others’ posts. **Don’t hold until the last minute, post as early as you could! This is an effective way to check your understanding on the materials and reviewing the homework assignment.** In addition, you have the very first discussion (Discussion 0) as an introduction.

Note: No late discussion posts will be accepted.

PROJECT (200 POINTS)

Project includes THREE parts:

- 1) **Team Contract (10 Points):** Gather in groups (each group may include 2 to 4 team members). Select a data set that satisfies the requirements, or pick one from the Team Project Group List . Split up work evenly and complete the Team Project Contract. See **Modules → Project Part 1** for more information.

- 2) **Individual Report (90 Points):** Each team member choose ONE variable (NO two team members may pick the SAME variable). Complete a basic descriptive statistics analysis on your chosen variable using EXCEL, and complete an individual report. See **Excel Demos and Sample Individual Report** (posted under **Modules → Project Part2**) for more information. **Late work will be penalized at the rate of 10 points per day late, including weekends, for a maximum of THREE calendar days. After the third late day, no late work will be accepted.**
- 3) **Team Report (100 points):** Work in teams, complete a multiple regression analysis using EXCEL, and complete a group report. **No late team report will be accepted.**

Note: You DO NOT have to meet in person in order to complete this team project. You may use TELECOMMUNICATION resources as much as possible, such as online chat, phone, email, etc. Teamwork is very important in real life.

EXAMS (500 POINTS)

There are two **PROCTORED EXAMS** given at BC main campus, approximately at the 3rd/4th and the 6th week. The first exam is midterm, covers from **Ch 1 through Ch 6**, and the second one is final, which is **cumulative (but 80%+ covers the materials from Ch 7 through Ch 12)**. Exams are closed book, closed notes, however, you can bring a couple pages of cheat sheet. Detailed exam information/instruction will be posted in Announcement approximately one week before the exam date.

For each proctored exam, three different time slots will be offered, on Friday evening, Saturday morning, and Saturday afternoon. **Make sure you SIGN-UP with ONE time slot at least 72 hours prior to the exam.** See detailed information and sign-up sheet links in Course Home Page → People → Groups.

No make-up exams are allowed, however, alternative exam may be scheduled ahead of time with at least 72 hours prior to the actual exam schedule.

Note: if you are located outside of the local area (>50 miles away from BC) or have extraordinary situations, you may fill out the “Off Campus Proctor Exam Request Form” (posted in **Modules → Getting Started**), and email the completed form to me. **Please note the last day to submit the form on Calendar.** Once your request is approved, you may take all three exams at your local **eligible testing center**. DO NOT fill the form if you simply have time conflict issue, we can arrange alternate exam schedule (subject to time/room availability).

GRADING POLICY

Individual assignments are graded on a scale of 100% with the following concepts:

- 1) **Work / Effort:** 20% for proper submission of something on time
- 2) **Correctness:** 70% for
 - any resemblance of a correct solution

- demonstrating true understanding the problem at hand
- for accurate results as required by the problem and the directions

Yes, 90% (out of 100%) means all done accurately.

3) **Professionalism / Neatness:** 10% for well-organized work, good formatting, nice labels, etc...

Note: this may be subjective

Final Grade is given based on:

925 -- 1000	A	4
900 – 924	A-	3.7
875 – 899	B+	3.3
825 – 874	B	3.0
800 – 824	B-	2.7
775 – 800	C+	2.3
725 – 774	C	2.0
700 – 724	C-	1.7
675 – 699	D+	1.3
600 – 674	D	1.0
Below 600	F	0

Note 1: A passing grade will not be given unless ALL REQUIREMENTS of the course are completed.

Note 2: In order to be fair to everyone, NO GRADE NEGOTIATION!!!

INSTRUCTOR'S EXPECTATION

My role as the instructor is to:

- Help students succeed in this course
- Share my knowledge and experiences to help expand on concepts discussed in the course
- Provide timely feedback to students
- Moderate discussions and challenge students to further their knowledge
- Evaluate and grade students

As a student in this course, I expect you to:

- Work hard to achieve the goals of the course
- Actively contribute to any discussions
- Share your thoughts, knowledge and experiences
- Cooperate and collaborate with other students

- Provide feedback to me throughout the course

OTHER INFORMATION

AFFIRMATION OF INCLUSION

Bellevue College is committed to maintaining an environment in which every member of the campus community feels welcome to participate in the life of the college, free from harassment and discrimination.

We value our different backgrounds at Bellevue College, and students, faculty, staff members, and administrators are to treat one another with dignity and respect. <http://bellevuecollege.edu/about/goals/inclusion.asp>

STUDENT CODE OF CONDUCT AND ACADEMIC INTEGRITY

Cheating, stealing, and plagiarizing (using the ideas or words of another as one's own without crediting the source) and inappropriate/disruptive classroom behavior are violations of the Student Code of Conduct at Bellevue College. Examples of unacceptable behavior include, but are not limited to, talking out of turn, arriving late or leaving early without a valid reason, allowing cell phones/pagers to ring, and inappropriate behavior toward the instructor or classmates. The instructor can refer any violation of the Student Code of Conduct to the Dean of Student Success for investigation. Specific student rights, responsibilities, and appeal procedures are listed in the Student Code of Conduct at: <http://www.bellevuecollege.edu/policies/id-2050/>

BELLEVUE COLLEGE E-MAIL AND ACCESS TO MYBC

All students registered for classes at Bellevue College are entitled to a network and e-mail account. Your student network account can be used to access your student e-mail, log in to computers in labs and classrooms, connect to the BC wireless network and log in to MyBC. To create your account, go to:

<https://www.bellevuecollege.edu/netid/>.

BC offers a wide variety of computer and learning labs to enhance learning and student success. Find current campus locations for all student labs by visiting the <http://depts.bellevuecollege.edu/helpdesk/students/>

DISABILITY RESOURCE CENTER (DRC)

The Disability Resource Center serves students with a wide array of learning challenges and disabilities. If you are a student who has a disability or learning challenge for which you have documentation or have seen someone for

treatment and if you feel you may need accommodations in order to be successful in college, please contact us as soon as possible.

If you are a person who requires assistance in case of an emergency situation, such as a fire, earthquake, etc, please meet with your individual instructors to develop a safety plan within the first week of the quarter.

If you are a student with a documented autism spectrum disorder, there is an additional access program available to you. Contact asn@bellevuecollege.edu or 425.564.2764. ASN is located in the Library Media Center in D125. www.bellevuecollege.edu/autismspectrumnavigators/

The DRC office is located in B132 or you can call our reception desk at 425.564.2498. Deaf students can reach us by video phone at 425-440-2025 or by TTY at 425-564-4110. Please visit our website for application information into our program and other helpful links at www.bellevuecollege.edu/drc

PUBLIC SAFETY AND EMERGENCIES

Public Safety is located in the K building and can be reached at **425-564-2400** (easy to remember because it's the only office on campus open 24 hours a day—2400). Among other things, Public Safety serves as our Parking Permits, Lost and Found, and Emergency Notification center. Please ensure you are signed up to receive alerts through our campus alerting system by registering at <http://www.bellevuecollege.edu/alerts/?ref=footer>

If you work late and are uneasy about going to your car, Public Safety will escort you to your vehicle. To coordinate this, please phone ahead and let Public Safety know when and where you will need an escort.

Please familiarize yourself with the emergency postings by the door of every classroom and know where to go in the event of an evacuation. Your instructor will be asked if anyone might still be in the building, so check in before you do anything else. Emergency responders will search for anyone unaccounted for.

If a major emergency occurs, please follow these two rules:

- 1) Take directions from those in charge of the response -We all need to be working together.
- 2) Do not get in your car and leave campus (unless directed to) - Doing so will clog streets and prevent emergency vehicles from entering the scene. Instead, follow directions from those in charge.

Please do not hesitate to call Public Safety if you feel safety questions or concerns at any time.

ACADEMIC CALENDAR

Please see Recommended Study Schedule and Canvas Calendar for details.
