Date: _____

Sustainable Business Practices 2014-2015 Associate in Arts (continued)

DEGREE REQUIREMENTS

Must earn a cumulative GPA of 2.00 in all coursework taken at BC, and in all courses applied to the degree. A minimum of 30 credits of the total must be completed at BC.

TRANSFER CREDITS

For credits from other institutions, meet with a faculty advisor or curriculum advisor for an initial unofficial transcript review.

For an official review, submit a Petition for Exception to Degree or Certificate Requirements and an official transcript(s) in the prior institution(s) sealed envelope to the Program Chair.

Petition: <http://bellevuecollege.edu/services/>
Program chairs: www.bellevuecollege.edu/classes/all/

NON-TRADITIONAL CREDITS

BC awards non-traditional credit for prior learning. Credit may be awarded for work completed in private study, at non-accredited institutions, or for certificate/training. Credit is awarded through examination, evaluation of certification/training, or submission of portfolio or other form of assessment. To apply for the credits, students must be registered at the college for the quarter in which non-traditional credits are requested and have completed ten quarter credit hours at the college.

For more information, go to <http://bellevuecollege.edu/enrollment/academic/nontraditional/>

STAYING ON TRACK

Use Degree Audit to track your progress toward completion of this degree at bellevuecollege.edu/degreeaudit

Please refer to <http://bellevuecollege.edu/programs/degrees/> for latest degree updates and further information.

GRADUATION APPLICATION

Students must apply for graduation. Submit your graduation application form two quarters prior to the expected graduation date and pay the application fee.

Application deadlines:

- Fall: June 1
- Winter: October 10
- Spring: December 10
- Summer: March 15

Sustainable Business Practices

DESCRIPTION

The associate degree in Sustainable Business Practices prepares graduates to become active and successful professionals in promoting and implementing sustainable business practices in a wide range of industries and organizations. Students will explore the interactions between environmental, financial and social systems; learn to incorporate principles of sustainability into every business decision; and learn to participate in environmentally-friendly or green business activities to ensure that all processes, products, and manufacturing activities adequately address current environmental concerns while maintaining financial health for the organization.

Learning Outcomes

Degree recipients should possess the skills and abilities described below:

- Present and discuss the complexity and breadth of sustainable business practices, corporate responsibilities, ethics, regulations and their implications for business organizations as part of a larger ecosystem that includes environmental, societal and economic systems
- Assess the sustainability of existing business practices and develop recommendations for improvement, as well as identify their short and long-term economic impacts
- Perform business analysis and audit regarding sustainable business practices and develop a cost/benefit analysis of existing and proposed practices
- Assess the effectiveness of resource and waste management practices throughout all aspects of a product or service life cycle and supply chain management
- Develop an effective communication and PR strategic plan to best train stakeholders and position an organization's commitment to sustainability and the environment
- Develop in depth economic analysis of business practices taking into account various scenarios to decrease overall organization impact on resources and the environment
- Compute an organization carbon footprint including assumptions and analysis, using basic processes and information technology tools
- Plan, implement and evaluate sustainability programs; and develop sustainability and environmental management reports
- Present the trends and various options in energy generation and management systems, and compare advantages and constraints based on specific industries, geographic locations and existing infrastructures
- Discuss corporate responsibilities, ethics and regulations as they relate to the environment
