Microsoft Network Support 2014-2015 Certificate of Achievement (continued)

CERTIFICATE REQUIREMENTS

Must earn a cumulative GPA of 2.00 in all coursework taken at BC, and in all courses applied to the degree. Complete at least one-third of all the credits applicable toward the degree or certificate in residence at BC.

DESCRIPTION

The Microsoft Network Support certificate addresses design, configure and support networks, infrastructure and workstations in implementations of varying size based on current Microsoft client and server operating systems.

Learning Outcomes

Certificate recipients should possess the skills and abilities described below:

- Configure services to support an enterprise network infrastructure
- Configure connectivity between network segments
- Manage the operation of a network from a central location and identify and resolve network connectivity problems
- Configure Domain Name Service to support a directory services database and install a directory services database
- Centrally manage users, computers and security settings
- Implement and administer a directory services database based on specific design requirements

STAYING ON TRACK
