<b>GRAND TOTAL</b>		182-189						

The Bachelor of Science in Nursing Program (RN to BSN) is designed for students with an associate degree in nursing. The RN to BSN nursing program curriculum expands knowledge and skills in evidence based practice, community health, professional communication, leadership, and health information technology (HIT), as well as healthcare systems and policies. Learning experiences are focused on individuals, families, groups and communities. Students have the opportunity to complete additional courses or fieldwork in specialty areas such as global health, leadership, community health and health information systems.

### LEARNING OUTCOMES

**Degree recipients should possess the following skills and abilities:**

- ☐ Evaluate and apply evidence-based research to clinical practice
- ☐ Appraise protective and predictive factors, including genetics, which influence the health of individuals, families, groups, communities and populations
- ☐ Develop and implement creative strategies to enable systems to change
- ☐ Negotiate and resolve conflicts to support professional, positive working relationships
