The phlebotomy technician program prepares students to certify and work as a phlebotomist in the clinical or laboratory setting. The program is designed to incorporate foundation courses in Allied Health education with focused courses in basic and advanced phlebotomy skills. The program includes required lecture, laboratory and practicum components to meet state and national standards for certification and employment.

LEARNING OUTCOMES:

Certificate recipients should possess the following skills & abilities:

- Describe the anatomy and physiology of the circulatory system
- Select correct blood collection tube for ordered test
- Select best vein for blood draws
- Use alternative techniques such as capillary punctures or bleeding times
- Use correct labeling and documentation techniques
- Communicate respectfully and professionally with co-workers, health care professionals, customers, patients, and their families
- Practice responsible and confidential communications and apply an understanding of laws and ethics as required in health care practice
- Recognize and respect cultural influences and perceptions
- Work within an integrated system of jobs and professions that make up the health care delivery system
