Digital Media Arts

Associate in Arts Degree

The Digital Media Arts associate degree provides students the opportunity to gain fundamental skills in the application of digital tools to video, games, animations, design and graphics in a project-based, hands-on environment. A range of elective options supports individual educational and employment goals. Students who have completed the degree should have a strong portfolio, workplace skills and trans-media competency. Robust faculty mentoring and frequent portfolio review support students as they prepare to continue their studies or pursue work as freelance artists or as employees.	
LEARNING OUTCOMES	
Degree recipients should possess the skills & abilities described below:	
 Effectively use a variety of tools and processes for producing contemporary forms of digital media 	
 Effectively use multiple contemporary media delivery platforms and delivery systems 	
 Use a cluster of industry standard applications to create digital media Use current industry standards of production, design, and function within a chosen area of specialization 	
 Apply coursework and area of specialization towards transitioning from school to working in the industry 	
 Identify career ladders and options for further education 	
 Plan, create and maintain a professional portfolio highlighting and mar- keting skills and capabilities. Present this portfolio via websites, blogs, and social media 	
 Collaborate and communicate in ways that support design team and/or group 	
 Accurately describe the phases of production (pre, production and post) as well as the project management tasks inherent in each phase
