The Bachelor of Science in Nursing (RN-BSN) Program is designed for students with an associate degree in nursing. The RN-BSN Program curriculum expands knowledge and skills in evidence-based practice, community health, professional communication, leadership, management, and health information technology. Healthcare systems and healthcare policies are also covered in the curriculum. Learning experiences are focused on individuals, families, groups, and communities. Students have the opportunity to complete fieldwork in specialty areas such as global health.

LEARNING OUTCOMES

Degree recipients should possess the following skills and abilities:

- Evaluate and apply evidence-based research to clinical practice
- Appraise protective and predictive factors, including genetics, which influence the health of individuals, families, groups, communities and populations
- Develop and implement creative strategies to enable systems to change
- Negotiate and resolve conflicts to support professional, positive working relationships
- Utilize intra- and inter-professional resources to resolve ethical and other practice dilemmas

- Assess and fully utilize sophisticated healthcare information management systems to maximize patient outcomes

PROGRAM ELIGIBILITY

Individuals must have:

- Associate Degree in Nursing from a regionally Accredited Institution (must include at least 35 quarter credits in nursing.)
- Cumulative GPA of 2.0 in all college courses.
- Minimum grade of 'C' (2.0) in all required courses for the associate degree in nursing.
- College level statistics course that includes inferential statistics. Course must be equivalent to 5-credits.
- Current unrestricted licensure as a registered nurse in WA state. Students in final year of an associate degree nursing program may be admitted, but must take and pass the NCLEX-RN by the end of their second quarter of the program. Successful passing of NCLEX-RN earns the student 45 college credits.
