IT 101*	Introduction to Information Technology (5 Cr)							
TOTAL		52-61						

* Standard department recommendation. Alternative choices are accepted, to support students' educational and professional goals.

**See Catalog for defined prerequisite or placement standards.

This program is designed to prepare students to meet the requirements to serve as an Emergency Department Technician. This entry to mid-level position assesses and manages a wide range of emergency conditions including respiratory, genito-urinary, and cardiac emergencies. They also assist in wound care and the application of orthopedic splinting devices. Also necessary is familiarization with specialized medical equipment and the ability to communicate effectively with other medical personnel, the patient, and the patient's family in emergency situations.

- Assist with patient monitoring for cardiac, respiratory, nervous, and genito-urinary emergencies
