<b>TOTAL</b>		<b>45</b>						

The Microsoft Network Support certificate addresses design, configure and support networks, infrastructure and workstations in implementations of varying size based on current Microsoft client and server operating systems.

**LEARNING OUTCOMES**

Certificate recipients should possess the skills & abilities described below:

- Configure services to support an enterprise network infrastructure
- Configure connectivity between network segments
- Manage the operation of a network from a central location and identify and resolve network connectivity problems
- Configure Domain Name Service to support a directory services database and install a directory services database
- Centrally manage users, computers and security settings
- Implement and administer a directory services database based on specific design requirements
